GRABO Klausur WS04/05

Aufgabe1: Fehlersuche (6 Fehler)

```
interface F{
    void f(int i);
};
char d;
public class A implements F{
    char c;
    double g(){
        const int i = 0;
        String s = "GRABO";
        c = s[0];
        return 3.5;
    }
    public void f(){
        float y;
        c = new char ('c');
        y = s();
    }
};
```
